California Creative Solutions, Inc. awarded Microsoft Gold Certified Partner status

San Diego, Calif., March 02, 2010 – CCS Inc. (aka CCS GlobalTech), a global Information and technology company that specializes in desktop and web application development announced today that it has achieved Microsoft Gold Certified Partner status.

The three key competencies acknowledged by Microsoft are Business Intelligence, Data Management Solutions and Security Solutions. CCS's strong expertise with Microsoft technologies coupled with the company's continued ability to meet customer's needs uniquely positions them for future success.

"Being recognized as a Microsoft Certified Partner further demonstrates our ability to deliver quality applications to our customer base. This certification will enable CCS to leverage our expertise and enhanced relationship with Microsoft for the benefit of our customers." said Raminder Singh, CEO of CCS.

About Microsoft Partner Program

Launched in October 2003, the Microsoft Partner Program is designed to help companies committed to working with Microsoft technologies expand their skills, provide them with opportunities to close more deals and deliver top-notch applications to their customers. The program offers a single, integrated partnering framework that measures and expands partner expertise, encourages the

growth of the total share that partners have in the technology marketplace, and helps partners' businesses be more experienced and professional. For more information please visit
