

FOR IMMEDIATE RELEASE

HELM Analytics™ launches new solutions suite

- HELM360 Suite™ enables compliance and business intelligence for enterprise systems-

POWAY, CA, September 15, 2009 – HELM Analytics™ formally announces the introduction of the HELM360 Suite™ a comprehensive supply chain automation toolset that addresses compliance, enterprise system automation while integrating full Business Intelligence capabilities. The HELM360 Suite™ provides customers with new technology, along with consulting services and actionable guidance for compliance, business intelligence and support for enterprise application development initiatives within a complex supply chain process.

“Businesses face increasing compliance regulations, transparency requirements, system shortcomings and manual processes while IT resources are stretched thin and project lists continue to grow” commented G. Shay Tengan VP of Business Development for Helm Analytics™. “The economy and consumer regulations mandate that companies improve customer service and retention while they attract new business and strive to increase business process efficiency” added Tengan.

Enter HELM360™ a comprehensive suite that provides support for compliance, enterprise wide system enhancements and Business Intelligence programs. HELM360™ increases operational efficiencies by automating manual business processes internally or within complex supply chain relationships.

“Rapidly changing compliance requirements, complex supply chains, business partnerships and varying levels of automation create risk and failure points for an organization. Our offerings help combat these risks with an integrated set of technologies and solutions” stated Cary Burch Co-founder and CEO of HELM Analytics™.

The Helm360 Suite™ provides business users with powerful reporting, dashboard, ETL, data mining, and data integration capabilities within their enterprise business applications. HELM Analytics™ offers consulting and comprehensive services that accelerate projects, help partners integrate legacy systems with new technologies and ensure enterprise investment success.

“Business Intelligence holds tremendous promise for increasing process efficiency, improving customer service, compliance process automation, tracking and reporting” concluded Tengan.

About HELM Analytics™ – HELM Analytics™, a division of CCS Global Tech delivers Comprehensive Enterprise Applications powered by Business Intelligence solutions. The company automates business processes and workflows within complex supply chain relationships. Our solutions include compliance, predictive analytics, data security, regulatory automation, reporting, and enterprise-wide business analytic capabilities for companies of all sizes.
